

NEW Oiltech Pavilion powered by oils+fats

drink technology India 2018 introduces Oiltech Pavilion powered by oils+fats, which will showcase technologies and innovations from key players in the vegetable/animal oils and fats industry. Benefit from the synergetic effects of these sectors of the liquid food industry: Beverage and liquid food producers often use technologies and packaging that are similar to those used in the oils and fats industry.

Find out what's going on in India's oil & fats market

- 25 million tons of oilseed harvested—the world's fourth largest vegetable oil economy
- The world's third largest importer of edible oils
- India is now the world's third largest lubricants market (after America and China)
- The oleochemicals market in India is forecast to surpass \$2.6 billion by 2025

Who should exhibit?

drinktechnology-india.com
October 24–26, 2018
Bombay Exhibition Centre | Mumbai

Who should attend?

- Oil processing industry
- Food industry
- Consumer groups
- Scientific institutes and official agencies dealing with extraction, refining, packaging and other manufacturing processes of edible oils and fats

Reasons why the Oiltech Pavilion powered by oils+fats is worthwhile:

- Shared location with drink technology India, India's leading fair for the beverage, dairy & liquid food industry.
- Benefit from the synergetic effects of multiple industry sectors. Beverage and liquid food producers often use technologies and packaging that are similar to those used in the oils and fats industry.
- Invest in the future of your business with three days at the trade fair. Showcase your business's products, technology and services.
- Open up new markets and meet potential customers at the dedicated pavilion for oiltech.
- Take a good look at the competition and use the occasion to sharpen your own image.
